### **Recommendation Letter**

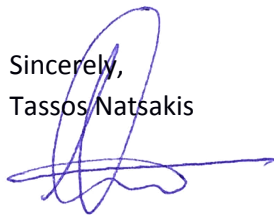

**To whom it may concern,**

I am writing this letter as support for the application of Mr Clotan Paul to the Artificial Intelligence masters program at the University of Bologna. I have known Mr Clotan since October 2022 in my capacity as associate professor in the Robotics and Non-linear Control group of the Technical University of Cluj-Napoca. Our main interaction has been during the educational activities of the Robotic Systems Control course, both during the lectures and practical sessions.

From my experiences with Mr Clotan, I can attest that he is a role model of a student. First of all, he is a self-motivated and proactive person, working on the task he is involved in without extra effort from my side. In addition, during the class, he is often raising interesting points that are beneficial for the rest of the students. This is an important aspect that assists in explaining concepts in the language of the students better. Finally, he has always been very well prepared for the laboratory exercises, having gone through the material covered in the theoretical classes and having prepared questions for the parts that were not clear.

Overall, Mr Clotan is a hardworking and determined person. He is a good communicator and his level of English is more than sufficient for the academic activities. Therefore I am confident that he will treat the master program with the outmost seriousness and will be a great asset for rest of the students and the program itself. Please do not hesitate to contact me if you would like further information.

Sincerely,  
Tassos Natsakis
